## PREFACE

This issue of the *Trade, Transport, and Communication Part of the Statistical Register for New South Wales* contains statistics for 1970-71, and earlier years.

The statistics given in this publication should be read in conjunction with the *Official Year Book of New South Wales*. For the latest figures in the principal statistical series, the reader should refer to other publications of the Bureau, particularly the *Statistical Bulletin* and the *Monthly Summary of Business Statistics*.

My thanks are tendered to the responsible officers of the various State and Commonwealth Departments and to others who have supplied information, often at considerable trouble.

R. G. Walker  
Deputy Commonwealth Statistician  
and  
Government Statistician of New South Wales

Bureau of Census and Statistics,  
Sydney.  
7 June 1972.

## EXPLANATORY NOTES

### Overseas Trade Statistics

1. Statistics of overseas trade are compiled from copies of customs warrants (or entries) lodged by importers and exporters (or their agents) with the Department of Customs and Excise.
2. The overseas trade statistics for New South Wales relate to the imports into and exports from Australia passing through the customs at N.S.W. ports. The imports do not provide a record of the overseas goods used or consumed in New South Wales, as some of the goods pass subsequently to other Australian States and some goods imported through other States pass into New South Wales. The exports include products of other States shipped overseas from N.S.W. ports, but exclude products of New South Wales shipped overseas from ports in other States.
3. *Valuation of Overseas Imports and Exports*
  - (a) The values shown for goods *imported* are the values on which customs duty was payable, or would have been payable if the duty was charged *ad valorem*. In assessing goods for *ad valorem* duty, their value is taken to be the actual price paid by the Australian importer, plus any special deduction, or the current domestic value in the country of export, whichever is the higher, together with all charges for placing the goods free on board at the port of export. Import values are therefore shown on an f.o.b., port of shipment, basis and are expressed in Australian currency.
  - (b) The values shown for goods *exported* are also on an f.o.b., port of shipment, basis, expressed in Australian currency. In general, they have been assessed as follows:—
    - i. Goods sold to overseas buyers before export—the f.o.b. equivalent of the price at which the goods were sold; for example, for wool, the actual price paid by the overseas buyer, plus the cost of all services incurred by him in placing the wool on board ship.
    - ii. Goods shipped on consignment—the Australian f.o.b. equivalent of the current price offering for similar goods in the principal markets of the country to which the goods were despatched for sale; for wool, the f.o.b. equivalent of the current price ruling in Australia normally provides a sufficient approximation of the f.o.b. equivalent of the price ultimately received.
4. (a) *Outside packages* (containers, crates, etc.) are treated as a separate item in the classification of imports. For exports, however, the value recorded for each item includes the value of outside packages.  
 (b) Throughout this publication, the value of *Parts* of articles is included with the value of the complete units, unless otherwise stated.
5. *Stores* (including bunker coal and oil) taken on board ships and aircraft departing from New South Wales for overseas countries are excluded from the figures of overseas exports. (Details of ships' and aircraft stores exported in recent years are given on page 36.)
6. The statistics of overseas trade include imports and exports on government account (which are treated as normal transactions) and those "passengers' personal effects" for which customs entries are required.
7. Goods are shown as exported "*For Orders*" where the country of destination was not determined at the time of export.
8. (a) Figures shown in this publication for *E.E.C. Countries* and *E.F.T.A. Countries* represent the trade in the years shown with the countries which at 30 June 1971 were members of, or associated with, the European Economic Community and the European Free Trade Association, respectively. The *E.E.C. Countries* are Belgium-Luxembourg, France, Federal Republic of Germany, Greece, Italy, and their dependencies; and Netherlands. The figures for *E.F.T.A. Countries* include Denmark, Finland, Norway, Sweden, Austria, Portugal, Switzerland, and their dependencies, but exclude the United Kingdom.  
 (b) From 16 September 1963 the Federation of Malaya, the Colonies of North Borneo (renamed Sabah) and Sarawak, and the State of Singapore federated to form the Federation of Malaysia. Singapore withdrew from the Federation on 7 August 1965. Figures shown for trade with Malaysia in this publication include Singapore from 1 July 1964 to 30 September 1965. Figures shown for other periods relate to the Federation as it existed at 30 June 1966.
9. (a) From 1 July 1965 items of overseas imports into Australia have been classified according to the new Australian Import Commodity Classification, which is based on the revised United Nations Standard International Trade Classification.

## EXPLANATORY NOTES (continued)

### Overseas Trade Statistics (continued)

9. (b) From 1 July 1966 items of overseas exports from Australia have been classified according to the new Australian Export Commodity Classification, which is based on the revised United Nations Standard International Trade Classification. Where possible, figures for periods before July 1966 have been adjusted to correspond to the new classification, but in some cases the figures are not strictly comparable.

### Shipping Statistics

10. The shipping statistics shown in Tables 1-15 and for 1966-67 and later years in Table 16 have been compiled by the Commonwealth Statistician, and relate to vessels engaged in the carriage of part or full cargoes for civil purposes. Naval vessels, vessels of less than 200 tons, and all pleasure craft are excluded from the scope of the statistics. The shipping statistics shown in Table 17 and for 1965-66 and earlier years in Table 16 have been compiled by the Maritime Services Board. All trading vessels (including vessels of less than 200 tons) are included within the scope of these statistics, but naval vessels and pleasure craft are excluded.
11. In statistics of "overseas" or "interstate" shipping, a vessel is counted as an entry once, and as a clearance once, for each voyage to and from New South Wales, being entered at the first port of call and cleared at the port from which it finally departs. In statistics of "intrastate" shipping, a vessel is counted once for every occasion on which it enters or clears a port in New South Wales.
12. Shipping classified as "overseas direct" relates to vessels whose first port of call (for entrances) or last port of call (for clearances) in Australia was in New South Wales. Shipping classified as "interstate and overseas via states" relates to vessels whose last previous port of call (entrances) or next port of call (clearances) was a port in another Australian State. Shipping classified as "intrastate" includes both movements of vessels engaged exclusively on intrastate voyages and any intrastate component of voyages originating or terminating overseas or interstate.
13. The gross tonnage of a vessel measures the internal cubic capacity expressed as tons, with 100 cubic feet equalling one ton. The net tonnage is the gross tonnage less spaces (e.g. engines and crew's quarters) which cannot be used for the carriage of cargo or passengers.
14. In recording cargoes, some commodities (e.g. coal, ores, wool, wheat, sugar, newsprint, and iron and steel) are assessed at their dead weight in tons, while others (e.g. butter, petroleum and motor spirit, textiles and apparel, and many manufactured goods) are recorded in tons measurement, 40 cubic feet being taken as the equivalent of one ton.

### Motor Transport Statistics

15. In Tables 20 and 21, Sydney Statistical Division differs from the Sydney Statistical Division as defined for general statistical purposes, in that it excludes the whole of the City of Blue Mountains.

### Road Accident Statistics

16. In New South Wales, road accidents resulting in personal injury or death or damage to property exceeding \$50, must be reported to the police within twenty-four hours. Those accidents which involve casualties, breach of the law, or damage to vehicles are analysed by the Commissioner for Motor Transport. The road accident statistics in this publication are based on this analysis.
17. In road accident statistics, the determination of "responsibility" and "principal cause" is widely recognized as often depending on the subjective assessment of a variety of contributing circumstances. Because of this, and because the concepts applied in assessing known circumstances may not be uniform, the statistics showing the cause of accidents in New South Wales are not necessarily comparable with similar statistics published for other Australian States or for overseas countries.

### No. 3. Export Price Index, Australia

This Export Price Index, which is a fixed-weights index, is currently under review. Pending completion of the review, the index numbers from 1969-70 have been compiled on an interim basis which incorporates a reweighting of the items contained in the previous series, the inclusion (in the "All Groups" index number) of 4 additional items (iron ore, bauxite, alumina, and mineral sands), and an adjustment of group weights. The interim series has been linked to the previous series at June 1969. The weights of the items in the interim series have been derived from the values of exports in 1969-70; those of the items in the previous series were based on the exports (valued at 1959-60 prices) of the commodities in the five years 1956-57 to 1960-61. The 33 items contained in the interim series accounted for 74 per cent. of the total value of Australian exports (merchandise and non-merchandise) in 1969-70.

Base of each Group Index: 1959-60 = 100

\* Includes, since December 1968, persons charged with driving or attempting to drive a motor vehicle while having the prescribed alcohol concentration in their blood or with refusing to undergo a breath test or analysis. In 1970, there were 11,713 such offences charged.

† Includes offences by pedestrians.

‡ Fine paid without court appearance. Persons charged with parking, etc. offences (since 1954) and less serious driving offences (since 1962) may elect to plead guilty and to pay their fine without a court appearance. Since 1962, police officers have been empowered to serve on-the-spot notices of these offences (the notice setting out the offence with which a person is charged and the standard fine for that offence).
